

Programming Skills

Proficient Languages:	Rust, C++, C#	Databases:	MongoDB, SQL, Neo4j
Familiar Languages:	C, Python, JavaScript	Cloud:	AWS, S3
Version Control:	Git, GitHub, Perforce	OS:	Ubuntu, Windows, MacOS
Game Engines:	Unreal Engine, Unity	Other:	ROS, React, HTML, LaTeX

Work Experience

- Apr 2025 - Present **Software Engineer II**, *The Walt Disney Company*, Seattle, WA
- Developed for both Hulu and Disney+ client applications using in-house Rust frameworks.
 - Drove technical improvement and product initiatives to boost watch time and reduce app failures.
 - Utilized AI tools to undertake large-scale refactor to increase resiliency of client side code.
- Sep 2021 - Oct 2024 **Software Engineer**, *HaptX Inc.*, Redmond, WA
- Wrote C++ API and plugin code supporting VR experiences with HaptX Gloves G1.
 - Improved plugins for Unreal Engine and Unity with a focus on enhancing interactions and animations with virtual hands.
 - Designed and implemented nodes to support robot operation using ROS 1 and 2.
- Aug - Nov 2022 **UI Engineer**, *Tangible Research*, Redmond, WA
- Competed in the ANA Avatar XPrize with a team of 5 engineers.
 - Implemented a C++ plugin for OdenVR's Voysys VR streaming application which enabled the creation and customization of extensible UI that controlled our telerobot through ROS.
 - Designed final UI which enabled a smooth user experience through our powerful and flexible telerobot.
- May - Aug 2021 **Fellow**, *WPI IDEaS Studio*, Worcester, MA
- Developed a Unity C# app designed to teach students about free body diagrams.
 - Created a sitemap and recommendation list for how to improve the Jazz History Database website.

Education

- 2017 - 2021 **Computer Science (CS) + Interactive Media & Game Development (IMGD)**, *Worcester Polytechnic Institute (WPI)*

Projects

- Aug 2020 - Jun 2021 **Gameplay Programmer & Audio Engineer**, *Factory Reset (WPI)*
- Won WPI's **Provost Award** for the best capstone project in the IMGD department.
 - Collaborated with 3 other developers to design and implement a 3D first-person puzzle game focused on accessibility.
 - Implemented core gameplay systems and accessibility settings using Unity C#.
 - Composed 2 music tracks and created more than 15 unique sound effects.
 - Shipped *Factory Reset* for free on itch.io.
- Oct - Dec 2019 **Full Stack Engineer**, *Star Trek Mashup (WPI)*
- Worked in a team of 4 designing and implementing a cloud-based application using AWS to upload and combine *Star-Trek* clips.
 - Developed an API from scratch using JavaScript for interaction with the app's backend.
 - Produced an app that fulfilled assignment specifications and utilized a variety of AWS's features.
